ASTRO ETHICS:

GRAND ETHICAL CHALLENGES FOR SAFEGUARDING HUMAN HEALTH IN OUTER SPACE

LEARNING OBJECTIVES

At the conclusion of the session, participants should be able to:

- Describe health-related hazards of spaceflight and how these are addressed in the context of research and clinical care.
- Differentiate between Earth-dependent and Earth-independent care and rationalize the types of missions that are most conducive to each.
- Identify ethical issues of treating, monitoring and managing patients at various timepoints in their spaceflight experience (i.e. before, during and after flight).

PANELISTS

- Eric M. Bershad, M.D., Associate Professor, Department of Neurology, Neurosurgery, and Center for Space Medicine, Principal Investigator of the Commercial Astronaut Data Repository (CADRE), Section of Neurocritical Care and Vascular Neurology, Baylor College of Medicine, Baylor St. Luke's Medical Center
