

## **BCM PA Program Diversity Report Card – 2022**

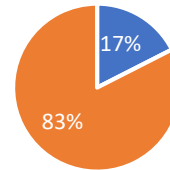

The BCM PA Program is committed to the recruitment and retention of a diverse student body. We believe in cultivating an environment such that our students have the capacity to live and practice diversity, equity, and inclusion as learners and in their future communities as clinical providers. Our student body is comprised of multi-talented, multi-cultural, traditional, and nontraditional individuals. Amongst our students, many are pursuing second careers, recent college graduates, served in the military, members of LGBTQ community, were the first in their family to attend college, are from medically underserved areas, are multilingual, hold various religious and political beliefs, were collegiate athletes, and are parents.
