

A Research Study on the impact of

# MISOPHONIA

on children and families

**Is your child between the ages of 5-20?**

**Has your child received a diagnosis of  
misophonia or do they experience severe  
sensitivity to certain sounds?**

**If so, you may be eligible to participate in a  
study looking at misophonia among children  
& young adults aged 5-20.**

Eligible participants will complete a 90 minute visit with an interview and online questionnaires. They will then be sent monthly 5-10 minute surveys to fill out for six months. Participants are asked to complete a 30-to-60 minute online questionnaire again 6 months after the start of the study

Participants will be compensated up to \$110 (\$55 for parent and \$55 child) for participation

This study is being conducted by Dr. Andrew Guzick at Baylor College of Medicine, Houston, TX.
