IMMUNIZATION REQUIREMENTS FOR RESIDENTS AND FELLOWS

Requirements based on Texas Department of State Health Services, OSHA policy and Centers for Disease Control recommendations.

- Tetanus/Diphtheria/
Pertussis: Booster dose of tetanus-diphtheria-pertussis (Tdap) within last 10 years. A Td booster is not sufficient.
- Measles (Rubeola): Acceptable proof of prior immunization with 2 doses of vaccine on or after first birthday at least 30 days apart; or serologic confirmation of immunity.
- Mumps: Acceptable proof of prior immunization with 2 doses of vaccine on or after first birthday at least 30 days apart; or serologic confirmation of immunity.
- Rubella: Acceptable proof of prior immunization with 2 doses of vaccine on or after first birthday at least 30 days apart; or serologic confirmation of immunity.
- Varicella: Acceptable proof of prior immunization with 2 doses of vaccine at appropriate interval; or serologic proof of immunity.
Self-report or physician report of disease is not sufficient.
- Hepatitis B: Series of three immunizations: first dose, second dose 1 month after the first dose and third dose 5 months after second dose; or serologic confirmation of immunity.
- Tuberculosis: Only Mantoux results (in mm) for skin testing or IGRA blood test are accepted. Tine or Monovac are not accepted. Test should be placed and read by Occupational/Employee Health of your institution/hospital but may be completed through another clinic. The test must be done within 6 months prior to your start date.

If your TB test is positive, you must provide documentation of the positive test. A chest x-ray done within 12 months prior to your start date is also required. A chest x-ray only or prior BCG is not sufficient documentation of a positive test.
- Meningitis: Immunization is not required.
- OHP Forms: There are two forms to complete and return
- TB Respirator Questionnaire
- Acknowledgment of Receipt of Privacy Notice (“HIPAA” form)
