

"Alcohol-associated liver disease: from Bench to Bedside"

Gyongyi Szabo, MD, Ph.D.

Professor of Medicine
Harvard Medical School
Chief Academic Officer
Beth Israel Lahey Health

About this seminar:

The epidemiology and natural history of alcohol-associated liver disease and alcoholic hepatitis as well as current understanding of disease pathogenesis will be discussed. This presentation will provide updates for clinicians on current practice guidelines and for researchers on recent discoveries related to the molecular and cellular effects of alcohol on the liver and related organs. The presentation will also review ongoing clinical trials and emerging therapies in alcohol-associated hepatitis.
