CURRENT FUNDING PARTNERS

- National Heart, Lung and Blood Institute
- USDA/ARS Children’s Nutrition Research Center
- Cancer Prevention and Research Institute of Texas
- National Institute of General Medical Sciences
- National Cancer Institute

APPLICATION REQUIREMENTS

The official 9-week 2024 program dates will be June 3 - August 2, 2024. Participants must provide proof of health insurance.

Total compensation is ~$5,400

Application opens: early October 2023

Application deadline: January 15

Visit our website www.bcm.edu/smart for program dates, program details, application portal and answers to frequently asked questions.

THE SMART PROGRAM
SUMMER BIOMEDICAL RESEARCH PROGRAM FOR UNDERGRADUATES

The SMART Program has given me the opportunity to experience what state-of-the-art research is like. Thanks to the program, I was able to present my research at a national conference in which I gave an oral presentation and won an award in my field. This experience has really motivated me to pursue an M.D./Ph.D. in cancer biology and one day find a cure for cancer.

An exciting summer program that includes state-of-the-art research with diverse, interconnected learning opportunities!
LABORATORY EXPERIENCE

Students become lab members who contribute to research efforts in more than 20 basic and clinical science departments. Students and mentors are matched based on the student’s educational and laboratory experience and mutual interest.

ACADEMICS

**RESEARCH SEMINAR SERIES** helps students develop their knowledge and explore a large range of biomedical research topics. See website for a sample schedule.

**RESEARCH ABSTRACT AND PRESENTATION** requirements provide an opportunity to develop skills necessary for scientific success.

**OPTIONAL ELEVATOR PITCH COMPETITION** is a fun way to learn how to explain the importance of research to a broad audience.

**ZEESHAN HUSAIN, MASSACHUSETTS INSTITUTE OF TECHNOLOGY**

"I had a lot of fun and learned so much. It came in handy with some of the classes I am taking this term at MIT. It’s great seeing how everything somehow ties together."

**PROFESSIONAL DEVELOPMENT**

Weekly professional development workshops provide students with tools to maximize career potential. See website for list of workshop topics offered.

**SUPPORT**

Career professional development is offered through individual meetings with the program director, the director of career development center and student success manager.

**COMMUNITY**

There are many organized activities during the summer that provide SMART students opportunities to interact with their peers and current Ph.D. and M.D./Ph.D. students throughout the college.

**DAVID KRUEGER, UNIVERSITY OF CHICAGO**

"If you want to find out what research is all about in a positive environment where people collaborate and help each other, this is it!"

**NATIONAL RECRUITMENT**

Over the past 35 years, the SMART Program has provided more than 2,800 students from more than 245 colleges and universities an opportunity to experience research in an exciting environment. Approximately 80 positions will be available in 2024.

"For the first time in my life, I was around other students who were as fascinated by science as I am. It was ‘cool’ to be SMART."

**SARAH COPELAND, VANDERBILT**

**RESEARCH AREAS**

- Biochemistry
- Biinformatics
- Cancer Research
- Cardiovascular Sciences
- Cell Biology
- Computational Biology
- Developmental Biology
- Drug Discovery
- Epidemiology
- Gene Therapy Technology
- Human Microbiome
- Immunology
- Infectious Diseases
- Microbiology
- Molecular Biology
- Molecular Biophysics
- Molecular & Human Genetics
- Neuroscience
- Nutrition
- Pharmacology
- Physiology
- Structural Biology
- Virology
