

Precision Medicine Grand Rounds
**Bringing Wisdom to Data:
Big Picture Challenges for Precision Medicine**
Thursday, January 11, 2024 | 12:15 - 1:15 p.m.
Zoom Attendance Only

Objectives:

- Explain how the management of uncertainty and the governance of data and its downstream applications are emerging as challenges to realizing the promise of precision medicine.
- Examine the concept of wisdom as a possible guide in addressing these challenges.
- Discuss the implications of wisdom in terms of efforts to reduce uncertainty, capture psychosocial impacts, increase stakeholder engagement and representation, and ensure equitable access to precision medicine.

Mary Majumder, J.D., Ph.D.

Dalton Tomlin Professor of Medical Ethics and Health Policy
Center for Medical Ethics and Health Policy
Baylor College of Medicine
