

## FOREIGN COMPONENT FORM

NIH/PHS Definition: The performance of any significant scientific element or segment of a project outside of the United States, either by the recipient or by a researcher employed by a foreign organization, whether or not grant funds are expended.

[https://grants.nih.gov/grants/policy/nihgps/HTML5/section\\_1/1.2\\_definition\\_of\\_terms.htm](https://grants.nih.gov/grants/policy/nihgps/HTML5/section_1/1.2_definition_of_terms.htm)

An affirmative answer to any of the questions below indicates there is a “Foreign Component” on the project.

1. Are any portions of this project’s activities planned to be conducted with investigators at a foreign site anticipated to result in co-authorship?
2. Are any portions of this project’s activities planned to be conducted with the use of facilities or instrumentation at a foreign site?
3. Are any portions of this project’s activities planned to be conducted with the receipt of financial support or resources from a foreign entity?
4. Are any portions of this project’s activities planned to be conducted with the involvement of human subjects or animals outside the United States?
5. Are any portions of this project’s activities planned to involve extensive foreign travel by BCM project staff for the purpose of data collection, surveying, sampling, and/or similar activities?
6. Could any portions of this project’s activities have an impact on U.S. foreign policy through involvement in the affairs or environment of a foreign country?

If YES to any of the above, provide additional information about the relationship.

Name of Foreign Collaborator, Name of Institution, and Country:
Brief description of what the collaborator will be providing or contributing to the grant project:
Are other types of resources being provided? Please specify. (Example: Travel, Stipends/Fellowships, use of facilities or equipment)
Is the arrangement non-monetary or will there be a subaward (incoming or outgoing)?
Is a Material Transfer (MTA) or Data Transfer Agreement (DTA) needed?
Is there human subject or animal work conducted at the foreign site?
