

Designing and Creating eLearning Modules:

Are you seeking to develop an eLearning course or module for your instruction or professional development?

This 8 week learning studio is divided into two parts – Designing/Planning eLearning Modules and (2) Developing eLearning Modules. By the end of this workshop, you'll have the tools to create and develop effective learner-centered e-learning courses.

In this course you'll learn to:

Design & Planning

- Identify components of an eLearning Course
- Align your module (activities, assignments, materials/technology and assessments) to the objectives.
- Apply instructional design theoretical foundation, adult learning models and best practice to your module.
- Create a lesson plan

Developing and Producing

- Identify the 4 parts of the module blueprint for Development
- Apply the blueprint and theoretical foundation to develop eLearning elements and course.
- Author and create web based interactive courses using Articulate Rise.
- Share and Export Rise Courses within Blackboard Learn LMS or SuccessFactors

Who this course is for:

- Anyone wanting to learn to create web-based courses, grounded in instructional design principles and adult learning frameworks
