Psychodynamic Formulation: An Expanded Approach

Deborah Cabaniss, MD

Associate Director of Residency Training &
Director of Psychotherapy Training
Department of Psychiatry
Columbia University

Objectives: At the conclusion of this session, participants should be able to:

- Name two ways that society and culture may affect the psychological development of our patients/clients.
- Explain the three steps (defining, reviewing and linking) of the operationalized method for learning and teaching psychodynamic technique and formulation that I will discuss.
- Perceive the importance of writing short psychodynamic formulations for all patients.

Hybrid: Zoom & In Person

September 13, 2023
