Baylor Concierge Programs

Where Exceptional Care Meets Personal Connection

Navigating today's healthcare system can feel overwhelming—long wait times, scattered results and rushed appointments. We are changing that.

At Baylor's Comprehensive Healthcare Clinic, all of our Concierge Programs come together under one roof. Here, you receive far more than a doctor—you gain a dedicated team focused solely on you. Every program is designed to deliver proactive, deeply personalized care, guided by the latest science, so you spend less time navigating your health and more time living your life.

Built on proven models that rank among the best globally, these programs are designed to offer exceptional value with unmatched access to Baylor's expertise. You deserve healthcare that's easier, faster and tailored to your unique needs—and at Baylor, that's exactly what we deliver.

Why Choose Baylor?

The Baylor Difference

Patients and families place their trust in Baylor Medicine, the clinical arm of Baylor College of Medicine. Together, they form a powerful partnership—where groundbreaking science meets compassionate, personalized care.

Baylor College of Medicine stands at the nexus of groundbreaking science and innovation—and through our hospital affiliates across the Texas Medical Center (TMC), our faculty turn these discoveries into real-world advances for patients. From Baylor St. Luke's Medical Center and The Texas Heart Institute to The Dan L Duncan Comprehensive Cancer Center, Texas Children's Hospital, Ben Taub Hospital, the Michael E. DeBakey VA Medical Center, The Menninger Clinic and other leading institutions, our faculty deliver world-class care informed by the very research shaping the future of medicine.

What makes Baylor unique is how seamlessly discoveries from our laboratories translate into new treatments in our clinics, creating a direct path from science to healing.

Expertise You Won't Find Anywhere Else

Our physicians serve patients across many of the world's most respected hospitals, and as a result, we draw on a depth of clinical experience that few institutions can match. Because Baylor receives the majority of NIH funding within the TMC, our researchers contribute to nearly half of its total research output. Baylor physicians also make up more than 40% of the TMC's clinical workforce—an important reflection of our central role in advancing discovery and delivering care across the world's largest medical center. This integration allows us to care for a remarkably diverse population—people of every age, background and health need—which in turn fuels our ability to diagnose, treat and advance medicine across an extraordinary range of conditions.

For patients, this means access to opportunities that simply can't be found everywhere: participation in groundbreaking clinical trials, innovative procedures developed by Baylor experts and truly personalized care informed by precision medicine. Our leadership in genetics—ranked #1 in the nation—places Baylor at the forefront of tailoring treatments to each individual, making care more effective and outcomes more lasting.

For those who entrust their care to Baylor, that trust translates into something powerful: the confidence of knowing that the most advanced discoveries in medicine are already within reach—delivered by experts who are shaping the future of health.

Innovation that changes lives. Care that puts you first.

A 1-Day Picture of Your Health

Executive 360 Comprehensive Evaluation

(Includes one year of Concierge Healthcare)

Imagine walking into a single appointment and walking out with a personalized roadmap for your health. That's the power of the Executive 360 comprehensive health evaluation. In just one day, you'll undergo an unparalleled assessment that includes genetic testing through Baylor's nationally ranked genomics platform, plus in-depth screenings for heart disease, cancer, diabetes, neurological health and more.

Designed for the busy, health-conscious individual, Executive 360 delivers the most complete picture of your health—without the disruption of multiple appointments. It's the ultimate way to stay ahead of potential issues while maximizing your time. And because of how comprehensive this evaluation is, you only need to do it every 3-5 years—making it a smart, efficient investment in your long-term well-being.

Your experience features a complete physical exam with your Baylor physician and a team of specialists, along with advanced testing for vision, hearing, lung function, memory, body composition, bone density and VO2 Max. Widely regarded as the single best indicator of physical fitness and overall health, VO2 Max testing uses sophisticated metabolic analysis during graded exercise to reveal your current cardiovascular and musculoskeletal fitness. This insight helps your physician and wellness team tailor exercise recommendations and optimize your physical performance.

During your visit, you'll enjoy a nutrition consultation over a healthy, catered lunch and benefit from the most advanced cancer screenings available—including Grail, PSA, Pap/HPV and mammograms—tailored to your personal health needs. Before you leave, you'll meet one-on-one with your physician to review your results and receive a fully customized care plan.

Your Executive 360 experience is the entry point to our personalized Concierge Healthcare program, including a full year of membership at no additional cost.

*One day. One appointment.
A lifetime of insight.*

The Best of Baylor Focused on You, Concierge Healthcare

As a prominent leader in medicine, research and education for 125 years, our physicians and specialists are among the top in the nation. When you choose Baylor Concierge Healthcare, you're choosing more than just convenience—you're choosing a higher standard of care.

At the heart of the Texas Medical Center, Baylor gives direct access to a dedicated physician who coordinates every part of your care, bringing in top-tier specialists when needed and ensuring your experience is seamless from start to finish.

Convenience Meets Comfort

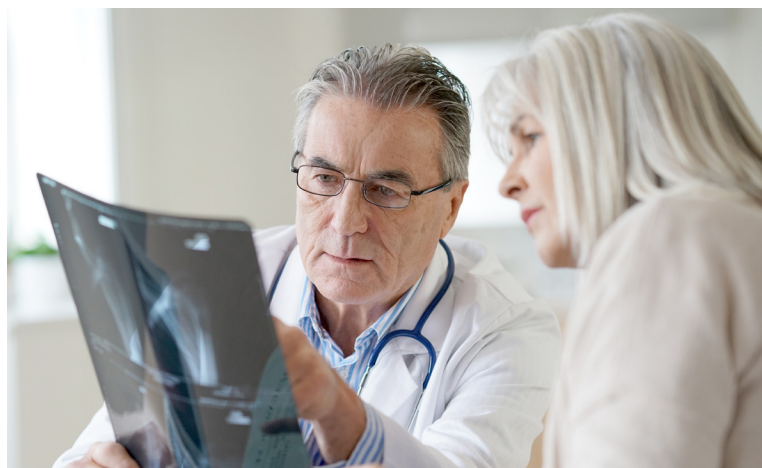

Appointments are guaranteed same-day or next-day and are easy to schedule. Your annual comprehensive physical is included as part of your membership, and whether you need to be seen in person or prefer a video consultation, your care team is available to you 24/7. When you visit our luxury clinic, you'll enjoy a calm, private lounge, complimentary valet service and, throughout every step, the highest level of hospitality.

Whole-Person Care, Backed by Science

Beyond convenience, our approach is deeply holistic. We don't just treat symptoms—we help you improve your nutrition, sleep, fitness and overall mental well-being with in-clinic access to nutritionists, exercise physiologists and behavioral health experts.

It's personalized care with purpose, designed around you, and all backed by Baylor's powerful research engine and world-class medical expertise.

*No waiting. No stress. Simply
better care—on your terms.*

Choose More Than Healthcare, Choose Baylor

At Baylor Medicine, our Comprehensive Healthcare Clinic goes far beyond traditional care. With preferred access and navigation to world-renowned Baylor physicians and specialists, cutting-edge diagnostics and a care experience designed entirely around you, we deliver the breakthroughs of academic medicine in a way that's personal and proactive—this is Tomorrow's Medicine, Today.

From the moment you walk through our doors, every detail is designed with your well-being in mind. And because we are Baylor, you gain the full strength of our legacy as a national leader in medicine, research and education—all focused on helping you live healthier, longer and better.

Personalized. Proactive. Powerful.
Welcome to care, redefined.

Interested in offering this program as part of your executive or corporate benefits? Our team would be delighted to help customize a solution for your organization.
