

The Department of Obstetrics and Gynecology
at Baylor College of Medicine and
Texas Children's Hospital present

Fetal Ultrasound: From first trimester to advanced fetal anomalies

- This intensive, interactive course provides extensive training in fetal ultrasound and the diagnosis of fetal anomalies through expert-led lectures, live scanning, and simulation practice.
- Participants will learn to perform and interpret first-trimester and anatomy scans, fetal neurosonology, and fetal echocardiography, with in-depth coverage of common brain, cardiac, genetic, and multisystem anomalies, including the role of fetal MRI.
- Taught by Baylor College of Medicine, Texas Children's Hospital and international maternal-fetal medicine specialists, fetal surgeons, pediatric cardiologists, radiologists, and genetic counselors, the course emphasizes practical skills, diagnostic accuracy, and options for prenatal intervention.

April 10-12, 2026

Texas Children's Pavilion for Women
6651 Main Street, Houston TX 77030
