— 2023 —
ANNUAL
REPORT

LETTER FROM PROGRAM DIRECTOR

Dear Community,

We are excited to offer you our first program annual report. June of 2023 marked ten years of having students enrolled in the Orthotics and Prosthetics Program at Baylor College of Medicine. As such, we could not be more excited to share an update on our program achievements; recognize our unparalleled alumni, faculty, and staff; and, to share our vision for the future.

If you are receiving this report, it is because we value your support, your contribution, and your commitment to the success of our program. We could not do what we do without our incredible community—a group of individuals who are committed not only to continuing to strengthen our profession, but also to ensuring our program remains one of the most well-respected in the nation. Together we have built a community who is here to see each other succeed.

We are excited for the accomplishments of 2023 and the opportunities that 2024 will bring. We will be hosting the International Society for Prosthetics and Orthotics Global Educators Meeting in October of 2024, and we will formally celebrate our tenth anniversary alongside the event. As you know, we place a tremendous value on quality education, and we are thrilled to facilitate discussions on orthotics and prosthetics education alongside recognizing the contributions of all who have made this program what it is today.

The structure of this report takes you on a journey from the first year of education to continuing professional development for graduates and preceptors, focusing on our most recently completed academic year (July 2022 to June 2023). I am grateful to those who have contributed to this program—we could not do what we do without you. I thank you for being a part of our journey and look forward to seeing where we go!

Sincerely,

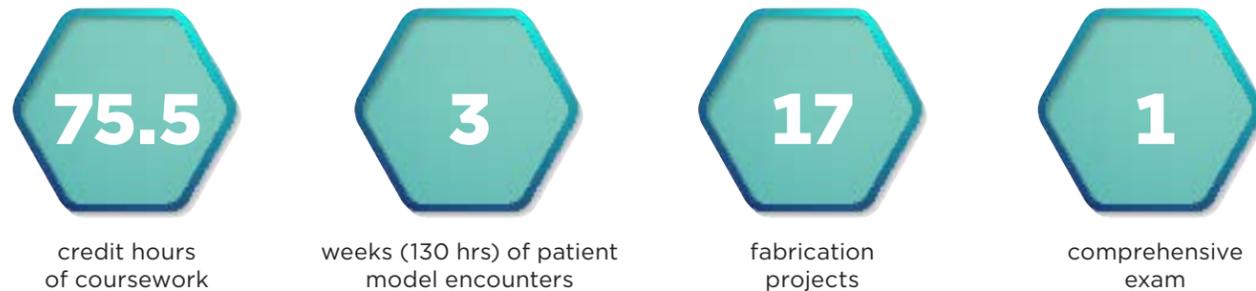

Ashley Mullen, PhD, MSAT, CPO
Program Director, Orthotics and Prosthetics Program
Associate Professor, School of Health Professions
and Department of Education, Innovation and Technology
Baylor College of Medicine

FIRST-YEAR

Each year our students matriculate during the third week of June and begin their journey toward their master's degree. This first year involves full-time curriculum, clinical encounters, and assessments which our faculty layer and build intentionally in a way that supports effective learning and long-term retention of knowledge and skills. The students meet, and in some cases surpass, the Commission on Accreditation of Allied Health Education Program's master's standards during this time. At the end of this year, students are fully prepared to enter their clinical residency.

HIGHLIGHTS OF ACCOMPLISHMENTS BY FIRST-YEAR STUDENTS

WHITE COAT CEREMONY

The students mark the passage of their comprehensive exam and their transition to the clinical residency with a White Coat Ceremony. Residents read the Oath of Practice and commit to the responsibilities associated with being a healthcare provider. The ceremony is marked by words of support and wisdom provided by faculty and class presidents.

RIITE Values Award for Class of 2023: Nathan Shimabukuro

CLINICAL RESIDENCY

Residents complete an 18-month dual orthotics and prosthetics residency that is approved by the National Commission on Orthotics and Prosthetics Education. In our integrated model, residents complete 5 clinical rotations, typically at four or five clinical sites, where they log an average of 1,000 patient encounters. Our clinical preceptors volunteer their time to work with our residents and provide them with a well-rounded, diverse experience.

PRECEPTOR AND RESIDENT AWARDS FOR CLASS OF 2022

Lucille M. Becker Clinical Achievement Award
Elizabeth Bebow

Clinical Teaching Excellence Award
Bobby Latham, XX and Alex Hedquist, XX

2022-2023 PRECEPTORS

Jose E. Ignacio, CPO, LPO

CONTINUING PROFESSIONAL DEVELOPMENT PROGRAM

After a successful pilot year, we completed our second year of the Continuing Professional Development Program. As a way to give back to our preceptors and alumni, this program offers up to 8 hours of free Continuing Education Credit each year and facilitates lifelong learning and community among our program constituents. This year's theme was "Research to Practice" and covered up-to-date research in a variety of clinical practice and professional areas.

Attendees

154 evaluations completed
(average 20 attendees/session)

Sessions

Eight sessions covering musculoskeletal assessment, cranial remodeling, ankle foot orthoses, scoliosis, upper limb prosthetics, professional resilience and workplace dynamics

Ratings ★★★★★

- 96%** would participate in more courses
- 95%** would recommend the course instructor
- 95%** agreed/strongly agreed courses were clinically relevant
- 94%** agreed/strongly agreed courses provided new and updated information
- 84%** agreed/strongly agreed courses demonstrated 'research to practice'

PROFESSIONAL ENGAGEMENT

As part of their commitment to service, our faculty (and, recently, one of our patient models!) represent the program on boards and committees for the American Academy of Orthotists and Prosthetists, the American Orthotic and Prosthetic Association, the American Board for Certification in Orthotics, Prosthetics, and Pedorthics, the Foundation for Orthotic and Prosthetic Education and Research, as well as the Texas Society for Orthotic and Prosthetic Professionals.

Our faculty are primarily appointed to serve the education mission at Baylor College of Medicine. In doing so, they consistently provide high-quality teaching and assessment of our students. In addition to their teaching excellence, they continue to grow professionally in research, leadership and professional engagement.

Looking Ahead to 2024

- **SHP Scholarships:** The School of Health Professions will be offering scholarships for the foreseeable future to current students and students matriculating in 2024. Starting in 2024, we are pleased to be able to offer two students each year a \$10,000 scholarship which will go towards tuition and fees for the program.
- **Tabitha Parker Endowed Scholarship:** The Orthotics and Prosthetics Program is pleased to announce the funding of an endowed scholarship in honor of Tabitha Parker (Class of 2020). This scholarship will be awarded for the first time to a student matriculating into the Class of 2026 and will offset tuition and fees for a deserving student.
- **Carol Sammet Legacy Fund:** This fund was set up in memory of Carol Anne Sammet (Class of 2020). Since its establishment, the fund has helped more than 20 students in the School of Health Professions who have encountered financial crisis. In the past year we participated in a successful fundraising campaign to ensure this fund continues to provide support to those in need.

Global Educators Meeting

COMMENCEMENT

Our students celebrate Commencement the first weekend of December each year. In 2022, 22 students walked across the stage. The week leading up to Commencement is filled with master's research poster presentations, comprehensive practical exams and exit interviews. We value the feedback provided by the students and continue to seek it from graduates and employers as we strive to serve our profession.

CLASS OF 2022 STUDENT AWARDS

Research Poster Competition Winners

1st PLACE Keyaira Crudup
Mentor: Amandi Rhett

2nd PLACE Michelle Cole
Mentor: Jeremy Sherman

3rd PLACE Priscila Aguilar
Mentor: Amandi Rhett
