

## Local HIV Biorepositories

Name	Description	Contact
UT Health (Dr. Arduino)	Plasma and serum samples. We have a list of participants (N=298) who were either naïve (N=132) or at different stages of ART at the time of sample collection and still available. 146 with HCV co-infection and 7 long-term non-progressors. Majority male (N=227) and from minority groups (120 Hispanic, 129 Black).	Dr. Arduino  Ortiz, Olga <a href="mailto:Olga.Ortiz@uth.tmc.edu">Olga.Ortiz@uth.tmc.edu</a>
Biorepository Core at Houston Methodist  (non HIV)	<ul style="list-style-type: none"> <li>• Collection, processing, and storage of samples per current global bio-banking standards</li> <li>• Research protocol specific collection, shipping, and record keeping</li> <li>• Maintenance of a database with basic clinical data elements for all samples</li> <li>• Round-the-clock monitoring of freezers with adequate backup and disaster recovery protocols in place</li> </ul>	Pam McShane, email- <a href="mailto:PMcShane@houstonmethodist.org">PMcShane@houstonmethodist.org</a>  Website: <a href="https://www.houstonmethodist.org/research/our-research/cores/serum-tissue-biorepository/">https://www.houstonmethodist.org/research/our-research/cores/serum-tissue-biorepository/</a>
IDDRC (Intellectual and Developmental Disabilities Research Center) Biorepository Core, BCM  (non HIV)	<ul style="list-style-type: none"> <li>o Storage of human cells, tissues, plasma, and other bodily fluid samples</li> <li>o Provide cultured cell lines, purified genomic DNA, and RNA</li> <li>o Next-generation sequencing techniques</li> <li>o Expression arrays</li> <li>o Epigenomic assays</li> <li>o Array comparative genomic hybridization</li> <li>o Proteomic</li> </ul>	<b>Contact-</b> Sandesh Nagami, email- <a href="mailto:nagamani@bcm.edu">nagamani@bcm.edu</a>  Website: <a href="https://www.bcm.edu/research/research-centers/intellectual-and-developmental-disabilities-research-center/cores/biorepository">https://www.bcm.edu/research/research-centers/intellectual-and-developmental-disabilities-research-center/cores/biorepository</a>

## Local HIV Biorepositories

UTMB	<p>We are interested in how persistent inflammation in the brain influences neurocognitive function in people with HIV/AIDS. Our current emphasis is on its effect on synaptic protein turnover and dopaminergic synaptic transmission. We are a national resource for HIV/AIDS neuropathology and a founding center of the National NeuroAIDS Tissue Consortium. We also participate in the CHARTER study, which is a multi-site cross-sectional and longitudinal study of dementia in HIV-infected people.</p>	<p>Ben Gelman: UTMB</p> <p><a href="https://www.utmb.edu/pathology/faculty/benjamin-b-gelman-md-phd">https://www.utmb.edu/pathology/faculty/benjamin-b-gelman-md-phd</a></p>
BCM (subcontract)		<p>BCM Site PI: Shital Patel, MD</p> <p><a href="mailto:shitalp@bcm.edu">shitalp@bcm.edu</a></p>
AIDS Malignancy Consortium	MD Anderson/BCM	<p>Elizabeth Chiao <a href="mailto:EYChiao@mdanderson.org">EYChiao@mdanderson.org</a></p> <p>Martha Mims <a href="mailto:mmims@bcm.edu">mmims@bcm.edu</a></p>
NeuroAIDS Bank	UT Health	<p>Rodrigo Hasbun, MD</p> <p><a href="mailto:Rodrigo.Hasbun@uth.tmc.edu">Rodrigo.Hasbun@uth.tmc.edu</a></p>
BCM CFAR	<p>Ending the HIV epidemic in Texas requires research on HIV prevention, cure, and the care continuum. Accordingly, the Texas D-CFAR home institutions are laser-focused on conducting this research in Texas— and helping others to do the same— in an effort to make high-impact contributions in the battle against the worldwide HIV pandemic.</p>	<p><a href="#">Texas Developmental Center for AIDS Research (Texas D-CFAR)   BCM</a></p> <p><a href="mailto:TX.D-CFAR@bcm.edu">TX.D-CFAR@bcm.edu</a></p>
BCM/MEDVAMC	<p>9/1/13--8/31/2024 NIH/NCI- AIDS and Cancer Specimen Resource The BCM Regional Specimen Biorepository of the ACSR will acquire, store and distribute biospecimens and data from HIV-associated malignancies for the ACSR enterprise. We will collect both fresh tissues and paraffin-</p>	<p>Dr. Michael Ittmann (<a href="mailto:mittmann@bcm.edu">mittmann@bcm.edu</a>)</p> <p>or Dr. Patricia Castro (<a href="mailto:pcastro@bcm.edu">pcastro@bcm.edu</a>).</p>

## Local HIV Biorepositories

	<p>embedded tissues. We will also collect clinical data for all specimens. These will be distributed as requested in a deidentified manner.</p> <p>Tissue, plasma, serum samples available.</p>	
<p>MEDVAMC Dr. Maria C. Rodriguez-Barradas</p>	<p>Pneumococcal vaccine sera bank Sera and clinical data are available for participants in pneumococcal vaccine studies. Patients include treatment naïve/pre-ART or on treatment. A subset has PBMCs stored.</p>	<p><a href="mailto:Maria.Rodriguez-Barradas2@va.gov">Maria.Rodriguez-Barradas2@va.gov</a></p> <p><a href="mailto:Dena.Mansouri@va.gov">Dena.Mansouri@va.gov</a></p>
<p>Thomas Street Health Center, "Evaluation of Chagas Disease Screening and Prevalence in At-risk People with HIV"</p>	<ul style="list-style-type: none"> <li>• Description of cohort/patients (HIV+, HIV negative, adolescents, adults, other): 300 HIV+ people &gt;11 years old, all from continental Latin America (or with mother from continental Latin America)</li> <li>• Study period (enrolling, closed): July 2021-June 2022</li> <li>• Can data be shared: No</li> <li>• Can samples be shared: Yes</li> </ul>	<p>Eva Clark, PI</p> <p><a href="mailto:eva.clark@bcm.edu">eva.clark@bcm.edu</a></p> <p>Phone: (256) 683-2943</p>
