

MD/MPH –Baylor College of Medicine 4-Year Integrated Schedule

The following is the integrated schedule for students pursuing the 4-Year MD/MPH program between Baylor College of Medicine and UTHealth School of Public Health based on the new curriculum beginning in August 2023. While this guide is provided as an academic planning tool, students are expected to discuss academic planning with their advising team.

Dual degree students must complete all partner program degree requirements and apply for graduation from the partner institution to be eligible for MPH degree conferral. In most cases, degree conferral for both programs must occur in the same semester. Students will be required to provide proof that a graduation application has been submitted to the partner institution during the MPH graduation application process. Please contact your campus or program coordinator if you need more information on enrollment requirements and degree conferral.

Students may also utilize the [Course Rotation Guide](#) and their [MPH degree planner](#) to prepare and plan for enrollment.
