

Poll Everywhere Visual Redesign 2022

Overview of Improvements

Multiple Choice

Bar & Column Charts

Bar column charts have been updated visually to have a cleaner, easier to read look. As answer results come in, the columns will continue to change according to the live results. The answer percentages are now displayed on the outside of the columns for increased visibility.

Correctness

Correct answers will now show a green colored check mark and will be highlighted in a selected color while all other answers will be grayed out.

Word Cloud

Based on the feedback we received, we decided to make all words in Word Clouds horizontal. Changing the layout of these words will make it easier for the audience to read submitted responses.

The screenshot displays a mobile poll interface. On the left, a sidebar contains a back arrow, the text 'Join by Web', the URL 'Pollev.com/username', a QR code, and the text 'Powered by Poll Everywhere'. The main area features the question 'How are you feeling today?' above a word cloud. The word cloud consists of various adjectives: 'curious', 'worried', 'calm', 'tired', 'happy', 'intrigued', 'positive', 'joyful', 'excited', 'good', 'stressed', and 'connected'. The word 'intrigued' is the largest and most prominent, followed by 'positive' and 'excited'.

Open Ended

In our new redesign, we have increased the spacing in between participant responses as well as made it easier to scroll through. We have also changed the spotlight feature so that it enlarges the answer and makes it easier to read.

What questions do you have for our leadership panel?

What advice would you give? ☆

Can we discuss the company goals for the upcoming year? ☆

What topic will you be addressing next? ☆

Q&A

The Q&A upvoting and downvoting feature has been redesigned with thumb's up and a thumb's down buttons to make it easier for participants to interact with responses. In our new design, to mark a question as Answered, you will need to click on the checkmark icon.

Do you have any questions for our leadership panel?

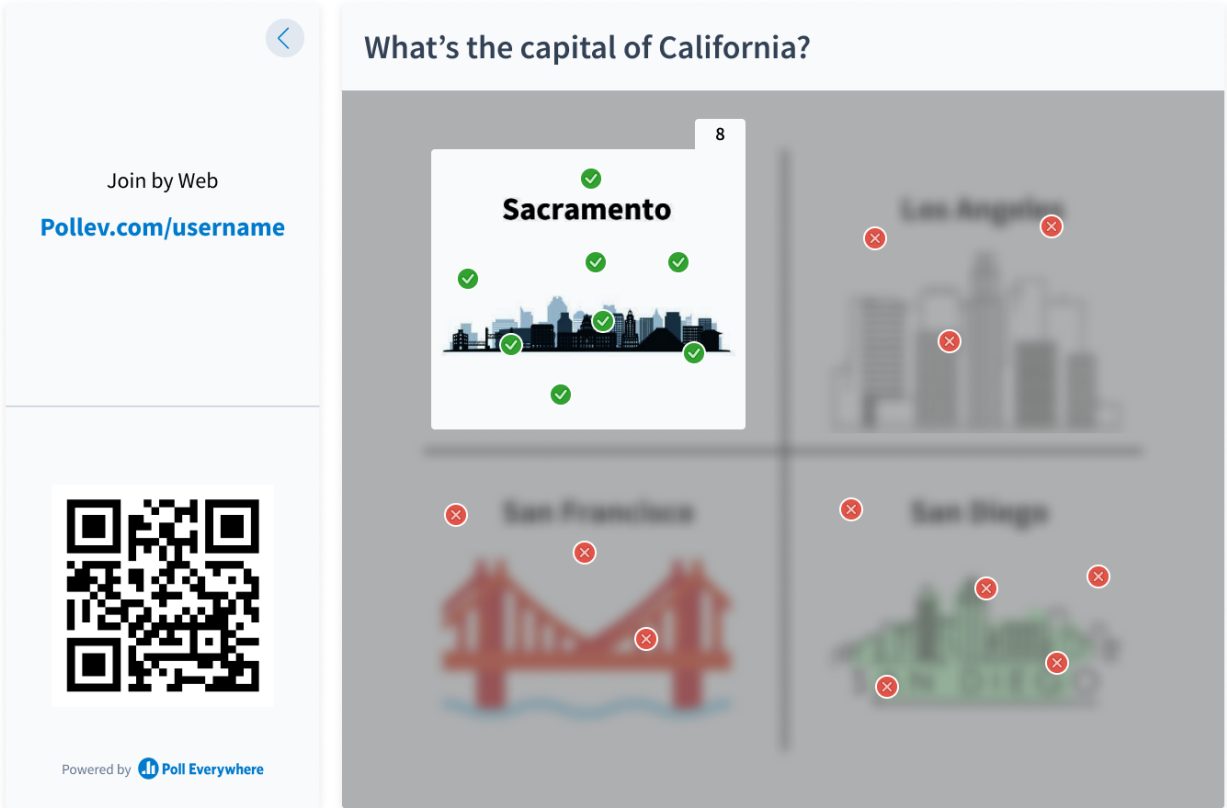

What do you see as your greatest failure? What did you learn from it?
👍 18 🗨️ 4

What do you look for in a leadership role? How do you assess what is right for you?
👍 13 🗨️ 3

How do you keep your team on track with the mission, vision, and values of the organization?
👍 11 🗨️ 1

Clickable Image

We have improved Clickable Image to be more accessible and visible for participants. We have changed the pin marker to be a circle marker for increased clarity and the correctness feature now highlights correct answers in a shaded gray region.

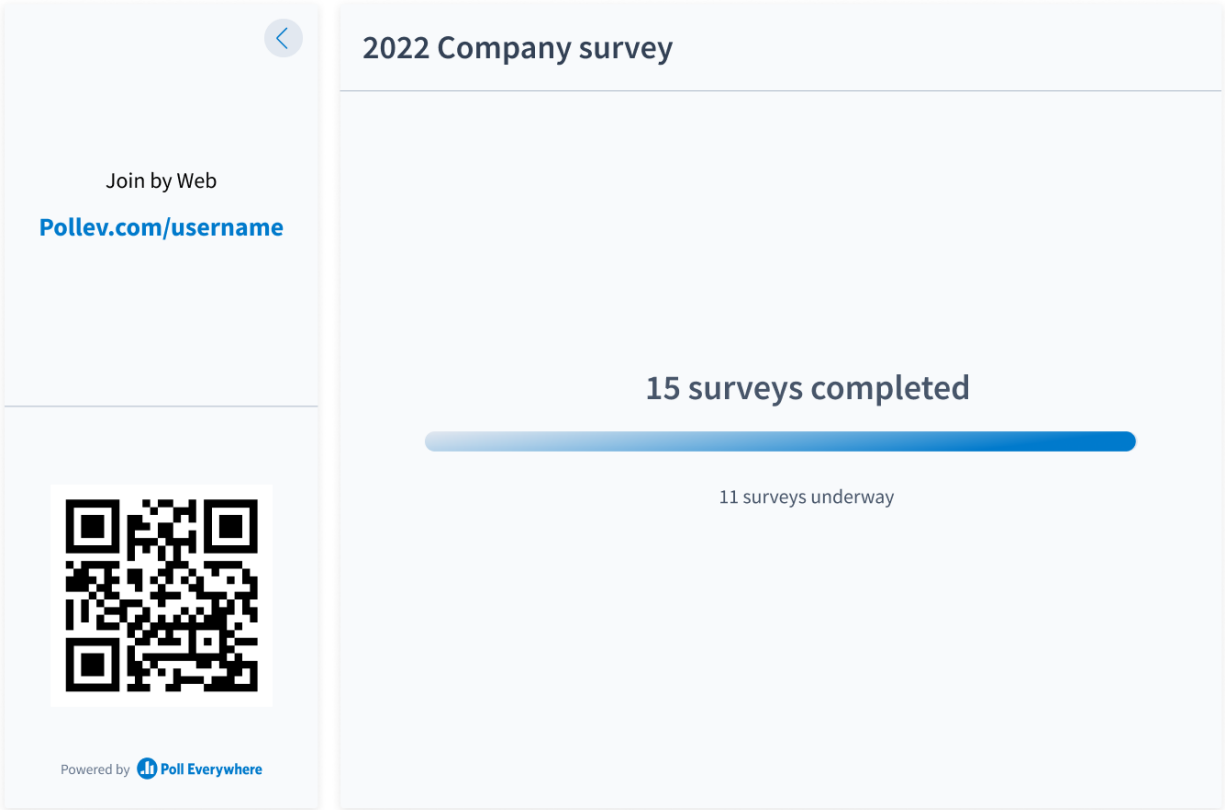

Ranking

Ranking activities have been redesigned to be cleaner and easier to read. Column bars are now thinner allowing for more answer options, and the ranking number position is now displayed on the outside of each bar column. The process for creating Rankings is still the same.

Survey

Surveys are now easier to read and navigate through the submitted responses. To help you focus on the results of the survey, we have removed the names of the respondents from the activity display. Don't worry though! As long as the survey is set to track responses and **not** set to anonymous, you can still find this information if needed.

Competition

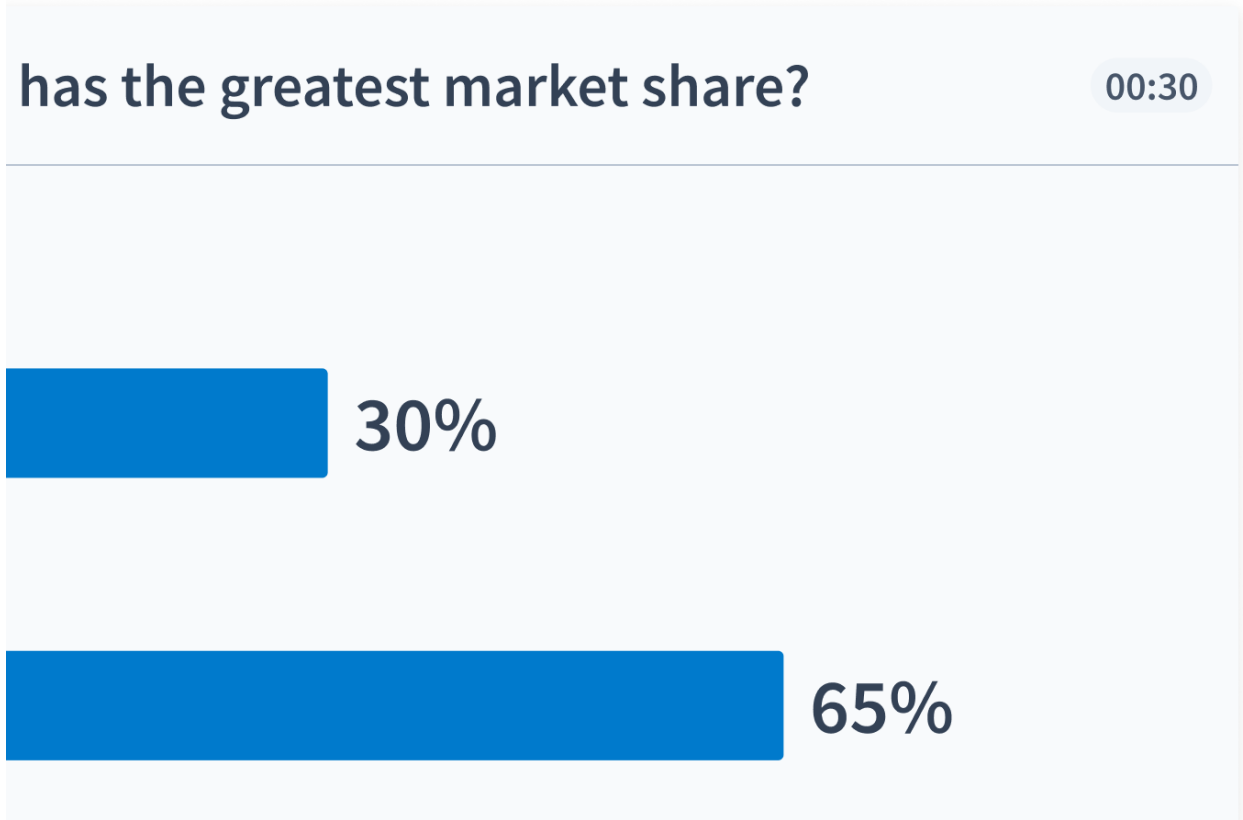

Competition titles have been moved so they are front and center. This will allow participants to be able to quickly and easily read each question. Within the leaderboard, participant names are now spaced out further to make it easier to see who is in the lead. As for the end of the competition, don't worry, we kept the confetti!

Left Hand Activity Panel, Instructions Panel & QR Code

Joining and voting instructions have been condensed into one easy to read panel on the left hand side of the activity screen. One of the most popular pieces of feedback we received was the request for QR codes in activity joining instructions. Participants can now easily answer your Poll Everywhere activities by scanning the QR code with their mobile device, which will then direct them to the activity answer page.

Timer

The timer function is now displayed above the participant counter. By default, when the activity is first created, the timer will be set to OFF. Settings for the timer are located in the **Configure** tab. To turn on the timer, navigate to the **Configure** tab and click on the **Time** ribbon. There you can toggle the on/off button for the timer.

Presenter Controls Bar

We have added a few additional control features to the Presenter Controls Bar, including:

- Timer and a circle display which shows how much time is remaining
- Restart button for the time, so presenters can start the timer over
- Pause button to pause the time if needed
