

## Why are we doing this?

We looked at the usage over a period of time and it is quite low. We want to provide a simplified user experience for our customers with fewer visual settings. Some of the visual settings as noted below in the table are no longer valid with our updated designs.

## How does this look in the application?

We are going to provide an in-app notification in the visual settings, as shown below.

**Below are the features that are being deprecated and associated actions needed to be taken**

Visual Settings	Activity type	How are your activities affected?	What action should you take?
Segmentation	Multiple Choice	All segmented activities become MCP's. Reports will be unchanged	Ensure all your segmented activities have reports created
