

Precision Medicine Grand Rounds  
**The Road to Precision Health to  
Reduce Cigarette Smoking**  
**Thursday, July 14, 2022 | Noon - 1 p.m.**  
Zoom Attendance Only

### Objectives:

- Interpret genetic and environmental factors contributing to smoking behaviors.
- Identify a strong scientific foundation for the pharmacologic treatment of smoking.
- Develop strategies for implementing treatment to help aid in reducing cigarette use.
- Analyze a strong analytic validity, strong clinical validity and growing clinical utility for returning genetic information to people to increase uptake of treatment for smoking cessation.
