

Dear Potential Research Subject:

We in the department of pediatrics – Tropical Medicine at Baylor College of Medicine are conducting research to understand the prevalence and distribution of ticks and tick-borne pathogens in Texas. We are asking the public to send in ticks they find for free testing. If you fill out this questionnaire (survey), you are consenting or agreeing to take part in this research. We will take all steps legally possible to keep this information confidential.

You decide whether you want to take part or not. If you do not take part, you will lose none of your rights. It will not affect you badly in any way. You may decide to stop taking part at any time. It will not cost you to take part in this study. We will not pay you to take part. We will conduct testing for pathogens of human importance on any tick you submit for free.

If you have any questions about this survey or the study, please contact Dr. Sarah Gunter at texastickproject@bcm.edu. If you have additional questions about your rights as a research subject, contact the Institutional Review Board for Human Subject Research for Baylor College of Medicine & Affiliated Hospitals at (713) 798-6970.

Thank you for your time.

Sincerely,

Sarah Gunter, PhD, MPH
